Notes w/ Dallas FO File

It was set up to index all of the reports and records from the three Dallas Main Files: 44-Main Ruby File, 89- Main Oswald File, and 100-Main JFK Assassination File.

These files make up about 3,500 entries. The DL FO Index was established to allow the office of origin to keep track of all these files.

The FBI HQ files compose about 60% of what is in the Dallas FO files.
That is, FBI HQ Main JFK Assassination File and Liaison with Commission File, plus HQ Ruby File, and the 105 HQ Oswald File.

The records and reports from other Field Offices—Chicago, Baltimore, Newark, New Orleans, etc. all went directly to FBI HQ.

Research note: 89-43-440 Hoover 11/24 announces press statement that will say that Oswald was the lone assassin.
