Re: Robert Silver, Steffan Sorensen, and Dr. A. George Abbott

Robert Silver(ed. of NY Review of Books)

Re: in this folder there is a copy of SM's promptings sent to Popkin to defend himself against criticisms by a Curtis Crawford in the NYRB.

Important: This material I believe is the stuff that Popkin did not use in his reply but SM claimed that he used to flesh out his book on the Second Oswald. In short, lifted it and did not ask or credit SM.

Steffen Sorenson folder(1968)

Re: SM correspondence about the Garrison case is the stuff in this folder. She has a funny letter about being unmasked in her criticism of Garrison because she was on the CIA payroll. She is having fun w/ SS because he idealized Garrison. Also ref. to all her former friends who were down on her for attacking Garrison's efforts.

Dr. A. George Abbott(San Diego Assassination Inquiry Committee), 1968-1969.

Re: There is exchange w/ the good doctor over the Garrison case. His organization apparently was one of many taken in by the New Orleans trial.
