

Point: Why didn't Specter ask specifically when you pointed did you mean above the collar line or do you think the bullet exited through the collar and nicked the tie? A minuet of avoidance on Specter's part.

Point out how critical Carrico's testimony was because he was the only dr to see JFK fully clothed before they went to work on him.

Note: where are my photos of collar, tie, etc from Hal's collection? . . . . .

Autopsy project-5

You can check on the scalpel bit by checking on the emergency room nurses who removed JFK's , coat shirt and tie. See Henchcliffe 6H141 and nurse Bowron 6H136

Closing arguments:

Check with WC transcript for 1/27 p. 212 in Wrone's FOIA & Political Assassinations. See pp. 212-213 Rankin's puzzlement about JFK's alleged neck wound that was made by a bullet exiting his throat.

Point: WC includes pics of JFK's coat, shirt, and tie but none of his collar with the alleged bullet holes that are supposed to have overlapped indicating that a bullet made these "holes."

Leave for myself" Stombaugh's fiber tests to determine whether these "holes" or slits were made by a bullet (the bullet that then entered Connally and produced all his wounds. The so-called "magic bullet."
