

Shutdown H/PS #15

Re: Use with Session on the Shooting. . .

On 11/22/1963 the National Emergency Airborne Command Post was scheduled to have an exercise that day. Check out the system to see if all the command and control phone lines were in operation.

The exercise was cancelled "Due to Presidential Incident."

****But What is very strange is the apparent lack of response of the JCS to alert NORAD and our missile defense system. . . .where was the alert to a possible hostile attack from the Soviet Union, etc. . .

Was Kennedy's murder a decapitation attack followed by a massive preemptive nuclear strike on the US homeland and military bases overseas. In short, the opening salvo of an undeclared war.

***There was the same absence of expected response with 9/11

Where was the expected alert to SAC for tactical weapons in Europe and Pacific theatres.

In any real world situation in 1963 given the Cold War relations between the US and the Soviet Union the US defense command had to (we would hope) be prepared in the event that JFK's assassination was simply the first act in a decapitation attack followed by an all out preemptive nuclear attack on the United States.
