

This Mx Cy Oswald file was not established when he was in Mexico City but after the assassination, beginning with mailed copies of FBIHQ records. Mostly if not entirely copies of 105-82555, main FBIHQ LHO file. However, in the processing, FBIHQ copies have on occasion been substituted for Mc Cy copies, as is reflected by the referral slips, which were made for the processing of the 105-82555 file. These referral slips are those of the original HQ file processing and on the referral slips of it that number is lined through and the Mx Cy number is written in. However, the other FBIHQ copies are not withheld as previously processed.

The Mx Cy records pertaining to sending pix, tapes, etc. to Dallas night of assassination do not appear where they belong in this file. No ref of any kind to them. It is possible that 2040, who would gladly classify the classified sections of the daily papers, may have withheld them as classified.

If these HQ records were provided to replace allegedly destroyed Mx Cy records, there must be some Mx Cy records remaining because without them there is no apparent means of correctly serializing with 105-3702 numbers. This becomes more inexplicable because some are not Mx Cy records, like 164, which was from DL to Wash, with no copy indicated for Mx Cy and has no Mexican content.

Robert Kaffka, Serial 346, actually FBI San Francisco informer. I met him through Hal Verb and though immediately he was both nuts and a prococateur. His nonsense led to problems with the FBI for a Detrouiter whose name I've forgotten. Arnold Lewis Kesler is name. He is the apparent subject of Serial 372 in which his name is withheld. (Actually, it was first disclosed long ago.) Also # 373 but is disclosed in # 380.

Serial 586, coded cable HQ to Mx Cy, asks when CIA first told FBI that LHO had been to Cuban embassy. Apparently this info had been withheld from the FBI. (Does this indicate that when Eldon Rudd took the pix and tapes to Dallas the night of 11/22, they pertained to the Russian embassy only, or that he lied?) The CIA and FBI staffs in Mx Cy were in constant and close contact, according to the disclosed CIA records, so if not on a formal basis, at least informally the FBI should have known, unless the CIA made efforts to keep it secret. And why else would the FBI encode so non-national security a record?
