

DL #100-10461

Chief JESSE E. CURRY (NA) and M. W. STEVENSON, Deputy Chief of the Criminal Investigative Division, Dallas Police Department, were contacted 2/19/64 by SA VINCENT E. DRAIN and they stated they positively did not make any statement that there had been any conclusive evidence developed by Laboratory examination reflecting that the fragments of the bullet that was shot at General WALKER were identical with the bullet that took the President's life. CURRY related that GEORGE CARTER of the Dallas Times Herald was given the results of the FBI Laboratory report and that only one ballistics test had been made and that was by the FBI Laboratory. CARTER asked him if he was going to close this case and he said technically, "I guess so in view of MARINA OSWALD's testimony to the effect that OSWALD has been identified by her as the one who had shot at General WALKER in the Spring of 1963!"

Above furnished to Mr. White @ F.B.I. Lab. in
visiting Mr. Conrad on 2/19/64 by Mr. Drain

Marina shot
the President
Oswald
