

Oswald's rifle — The M/c could only
take a low pressure cartridge (small
Round). No way this rifle could take
a .30 Caliber bullet. — Any attempt
to use a .30 Caliber would result
in blowing up the rifle and sending the
bolt back into the shooter's face.

A 6.5 mm bullet has a .264 diameter
whereas a .30 caliber round has a
diameter has a .308 diameter.
High pressure
