Dear Senator Bill:

I hope your high-lighting of the FAA's JetStar farce will bring some self imposed discipline into Federal agencies. It is unfortunate that the people have so little we can do to prevent this sort of thing.

Here is another matter: It is my understanding that the Warren Commission has hired a one hundred dollar per day lawyer by the name of Norman Redlick to help produce it's final un-biased report. The FBI indicates this man is a Communist sympathizer, a member of Communist front organizations and pro-Cuban organizations. If this be true, what in hell is he doing on the Warren Commission? Justice Warren himself said that some findings may never be made public because of their security conditions. Through such a commission member this information will certainly have a pipe-line to Russia...yet will be deprived us. How can we expect an un-biased report if some of the findings will be handled by a man of such left-wing beliefs? Do you think this is prudent on the part of the Warren Commission? Why is it that these things can and do happen and that no one seems to give a dam and few can do anything about them. Is there anything you can do about this condition?

Respectfully,
