

Weebit on Long John
NBC-AM Radio - Monday
1/10/72 at 8-15 pm

LT: (introd) story WYT weeknd
Dr. J Lettman I talked to him
this pm, recorded the conversation
Haven't yet been able reach
Dr. Weebit (titles). Hope he
is back in him 15-20
minutes > get his views
on Lett's findings. Lett is
urologist student assoc.
extensively lectured written
extensively including a
couple of books (?)
57 yrs age. On D & W
Col U C of P & S
Has written articles read J's
describing series experiments
he did replicating
TSBD etc.

Taped interview - Lattimer

LT understand you student
assess of firearms & that
is possibly why you were
selected?

JL actually is cancer researcher
but interested in binocular
vision a JFK Parallel
many ways - write article -
then to annoy everyone
cite WK vig & pens
reasons in my cases
Very upsetting being pyle
accuse WC of gross contraband
Higgins was asked he
visiting prof Dallas &
was able sit on box in
binocular "where LHO sat"
& seemed easy while
critics saying hard shot
poor rifle too my glasses
missing from barrel
Was able get ID rifle & ID
bullets On frame 2
Dons did mock up

500 rounds vs 100 by FBI
dem one thing 4 sure —
ammo perfectly reliable
rifle " pistol
all were able hit target
3x at same distance
Mr. Oswald had used

Clear any crates not warrented
But still had doubts
of re trajectory of bullet
thru neck. Sketched
in NYT. Worn in him
So when was permitted
see actual photos was
interested see rear hole
clearly entrance quite far
above front hole of exit
That was aimed striking
finding after they be
looked if was any
sign bullet transverse
direction saw dent
no sign of any

If you are a rologist, let
you consider yourself
xpt also in forensic
pathology?

JK no by no means
but I do have available
xpts in pathology & in
X-rays, so I have better
capabilities than ordinary
citizen & fact I happen
have rifle practice
shiny he was perfectly
competent marksman
C. & different rifle
A no telescope

But re forensic xpts
3 leading ones
have & already
Blue labels by Hanson
Clark

do no neglect by American
forensic medicine.

LI who were the 3?

hatt sorry I do not have the
list but I can get it
for you — as in
1968-1969 NYT

do matter of record

One from U of Utah

" " One Western

> reading one need x
Med

Radiologist for T Heples

They came to generally

same conclusions but

in very technical language

by "pulverized erythrocytes"

not "air"

LI any possibility JFK

had Addison's

disease?

Late, has teaching over shoulders
typical of cortisone by
no ~~think~~ — ? —

LJ then you are satisfied
only LHO ?

JL yes I am satisfied
e that Bullet
re c Parkland Hoop
rifle had Asnes's handprint
on it no way hole

Calton - recommend
in X to plant at PHT
just foolish to think that
could be done. So clear

LHO found 392

Plus find to that typical

A bullet matched

gun on LHO when
arrested

Earl loze - tries justifying
removal of body -
but did lead to fact
forensic details were
absent - halo around
hole in back clearly indicates
entry - European
forensic community has
always looked askance

LT
Any value Helgen Week
Nidus Oak?

JL Helgena gentlemen in
world wonderful if
any of them had done it

(farewell America)

LT have to wait
to 9 pm news
to get Wecht
- he is giving talk to
morticians

Wacht 9:15 pm

LJ what you tell
Morticians tonight?

CW would not tell layman
(jurors
councils)

LJ I talked to JK L

urologist student
ason at University
will tell you few things
said

- No doubt LHO fired all
shots

- Latt interested in evidence

- learn student case by
foreman wounds WW II

- probably evidence is
not forensic path

- very close friend -
was student of Helgerman

- Latt feels after 4 alt Covid all
made available at Holmes -
what he saw shed light
completely, any doubt
re WC & LHO all shots
would like your comments

W quite interesting -
not trying to free him -
Latt insists on referring
to LHO as if need be
for records who friend
Pempted asked him if
any items he def had
LHO name on them
gets accepted which
Latt leads off to
LHO was the asson

LJ He did murder with
C same type gun
used in TSBD

to ever get same boy
- was able determine he could
- no one but man on boy
He owns LHO's rifle scope
back 49 or so ft at
2x distance pass scope
45 out of 50

W inconsistent to what is
known LHO ability
a Marine for point
records did very
poorly - failed
1st x passed
to low score 2nd x

Other inconsistencies
Frocin when read Hines
autopsy protocol & their
test VS subsequent
findings of spec panel
1969 readily
find obvious
semantic equivocations

2J) actually Dr. Rose eminent
forensic pathologist -
never in this case - that is
pt.

W) right H-B = Pierre
only French had some x
H-B more
But pt is, they were pathologists
& are on record
later Monty Fisher & others
official report also on record
It is these unfortunately
that findings (the word W)
show equivocation &
confused language on
certain pts

How fallen text arduous
is 100% positive

LTD Latt & outgoing sketch
says found pt of entry
higher than sketch

W) would take it with hands
wreathen what about
holes in shirt & shirt
Did shirt ride up &
JFK's head?

LI Lett find ace bandage
& brace (blue)

88 crutch

upright pointer

so x to record bullet

W) 0 to do = it

First shot struck him in

back - face sheet -

during an X-ray -

at lower part papers

Later moved over

shoulder =

now ball moves it
to head

Maybe have captured it in
entry hole in head
at occipital protuberance

Let Holo cruise
back of neck
forming entry

W can be analyzing
effect at exit
also Lett
Still has not determined
forens path fully
Quoted in NYT re
no gunny ball - for
pelvic argument only -
only gun floor of car
turn around - if entered
back hit neck
same angle

then would go back to floor
of car - not into
back of Gov &

Francis need
" path

LJ) why B Marshall
select Latt
if not felt competent
when CW JN
initially avoid?

W) very good questions
Answers itself
esp. if ads
fact that 3 of 4
paths 3 crit
1 w/ 1 depend
of WR

further coincidence the
defender is the
witness while
3 paths are not,
at least not so far

LJ no ^{premise} path who is
provable to
WR ??

W) was found from
fisher knots etc
higher complexity
in essence OK's

We finding
an antipony
But in factal matter
they showed divergence in
for Harris antipony
= " test

I used language that
implied less than ~~was~~ ^{is}
accepted certain
things

I was pleased by just
wrote just able
arrive ~~conclusion~~
which ~~outside~~
FPIs unable do

Another analogy re
heart transplants
DeBakey & Cooley ~~the~~

Academic arrogance
med practice

Cardinal med is
MD not learn
without another
specialty

How did do thrust self
let penic perth
Contracting — —
absolutely were like !!

LJ Feb 4
E hall 'y
and able ?
W Purely !!

Cyril Wecht
