

SA 89-43

The following investigation was conducted by SA J. DOYLE WILLIAMS on November 23, 1963:

AT DALLAS, TEXAS

It will be noted that information contained in the interview with WILLIAM O. STINSON on November 22, 1963, based upon information furnished by him, reflected the metal fragment in question removed from the Governor's body was lodged in the Governor's left thigh.

In interviews with Doctor CHARLES FRANCIS GREGORY and Surgery Supervisor AUDREY BELL, a determination was made that the metal fragment in question was actually removed from the Governor's right arm and that no surgery was performed in connection with the wound in his left thigh.
