

Date 12/6/63

On November 29, 1963, the distance from the front porch of the Texas School Book Depository Building at 411 Elm Street to the bus stop at Murphy and Elm Street was measured and timed by SA IVAN P. LEF. By going directly east on Elm Street from this Building it is a distance of five blocks and the time required to walk this was five minutes.

It is noted to cover the possibility that LEE HARVEY OSWALD, who was seen walking west on Elm Street, a route was taken from the Texas School Book Depository Building east on Elm Street to the bus stop at Murphy and Elm. This is a distance of seven blocks and requires seven minutes.
