Subject list for Available but Not Published (ABNP) pages
from Archives Documents re JFK Assassination.....2pp

Pages containing entries, starting with "subject # 1" and continuing
in numerical order, ... (rest of the book)

1) The index is partial. Certain topics were deliberately not covered. On the subject list, these are listed as #38, and 38D is a list of subheads which are not entered in this index. The aim of this compilation is not completeness, but simply to gather together information on the most important topics. For completeness, however, topic 38 and 38D, in particular, was prepared.

2) A guide to the format of a sample page of this index is on the page after next page.

3) Administratively speaking, the Dallas field office of the FBI handled the FBI's investigation of the "Oswald-hypothesis"; these reports were submitted from Dallas/FBI to Washington headquarters of the FBI, and thence to the Warren Commission, sometime with a covering letter from J. Edgar Hoover. They are listed by the Warren Commission on the "List of Basic Source Materials" as follows: Report: FBI; Agent: Gemberling; Subject: Lee Harvey Oswald; Date, date on the report; City, Dallas. (These are not to be confused with Gemberling reports which bear the title: "Assassination of John F. Kennedy: Allegations re others etc." which are not included in this index.

4) For each entry, that section of the synopsis which relates to it is quoted. These quoted have sometimes been abbreviated. Also, there are frequently typographical errors, as this index has been speed-typed, without much concern for typographical accuracy, except where page numbers are concerned.

5) For each entry, the following information is listed: abnp pages, published pages (with CE #'s); date of Gemberling report, the table of contents heading in the gemberling report under which the pages appear; the extract from the synopsis, if any, which applies; any withheld pages, if any.

The Hoch/Fensterwald list has been used to get CE #'s from CD page numbers. Any errors there will, then, carry over and appear here.

6) CD 1066 was not available when this index was constructed. As soon as its table of contents and synopsis arrives, an addendum will be constructed.

7) An archives microfilm order is being constructed based on this index. "*" next to a page number means that it ~~KXXXXXXXKXXXX~~ the first page of a sequence, and is, therefore, probably a title page. Title pages will be omitted from the order, but these first pages of a sequence will be included if, as they rarely do, turn out not to be just a title page.

8) When page numbers are enclosed in parenthesis, it means that the entry is not included in the page count, but is only indicated for informational and cross-reference purposes.

9) Page counts appear at the lower right, summing up all abnp pages for a given topic.

4187 pages, Natl Archives, WASH DC

ABNP = AVAILABLE BUT NOT PRINTED

2/2

10) On any topic, other special investigation conducted for the Warren Commission by the FBI (and usually at the request of the WC) will appear as "letterhead memorandums" with appropriate attachments and their titles are usually indicated on the List of Basic Source Materials.

These will appear in the format indicated by the following example:

1733 FBI Letter from the Director, FBI.....6/10/64 Wash DC
 with attachments

(a) Letterhead memorandum entitled "Lee Harvey Oswald; re Allegation that Oswald ate Rice Krispies the morning of 11 22 63" Wash, DC
6 8 64

(b) Letterhead memorandum entitled "Analysis of Ruth Paine's Garbage from 11 22 63" w/att Dallas
5 20 64

(1) Photos of Ruth Paine's Garbage cans

(2) Photos of boxtops at City Dump where Ruth Paine's garbage taken

(c) Interview of John Shnook, sales manager, General Foods 5 23 64
Detroit, Michigan

11) Special Investigative requests are not included in this index. In the event that they were admitted in evidence by the WC, and hence published, they will appear in Sylvia Meagher's index. If someone would take the time to scan the entire 187 page "list of basic source materials", comparing with the Fensterwald/Hoch CD/CE list as they go along, supplementary abnp listings for each topic could be added. (ie. those that are non-Contributing)

12) Synopsis frequently omit significant information. There is no way to tell whether a synopsis is correctly summing up the whole section, or reporting all data contained in the section.

12) After each title on the subject list appears 2 numbers;(3, 48), for example, This means that for that particular subject, there are 48 pages of "abnp" material, and 3 *d pages. As explained under (7) of this "notes and comments", * indicates pages which are title pages, in all probability.

13) Abbreviations: syn = synopsis; toc = table of contents; pp = pages; "=" means "is equivalent to"; (), see NOTE 8

14) ENTRIES ARE USUALLY IN CHRONOLOGICAL ORDER (ie, entered by ascending CD # assigned), but this is NOT ALWAYS THE CASE.

sample page and format (see sketch below. Letters are keyed to explanation which follows)

- A) Appearing in upper left hand corner, title of subject, and the number assigned to it on the subject list at the beginning of the index.
- B) Running down the left hand side, and underlined, the CD numbers assigned by the Warren Commission and National Archives to the Gemberling Report regarding the particular entry. (The date on the Gemberling report appears, underlined, somewhere on the right hand side. See "H")
- C) Immediately to the right of the CD number, there is an "open parenthesis"; just inside the parenthesis is a roman numeral followed by a captial letter. This is the designation from the table of contents of the Gemberling report covering the section being referred to.

D) Following the roman numeral designation, there is a semi-colon, and then some page numbers; these are the page numbers listed in the Gemberling table of contents for that report, which apply to the particular section cited by the roman numeral designation E&F) respectively, section and subjection head, as in table of contents. Example: if the table of contents reads , in the Gemberling report assigned CD # 1873:

"II Tracing of weapons connected with Lee Harvey Oswald 50- 65

- A) Oswald's water pistol.....51-55
- B) Oswald's carcano..... 56-58 "

and we are concerned with II-A, it will appear as

"CD 1873 (II-A; 51-55; Tracing of weapons connected with LHO/
Oswald's water pistol)"

- G) Listed beneath the CD #, the ABNP pages (available but not published) "*" indicates first page of a sequence, and is, therefore, probably a title page. If this is the case, it will be omitted from the microfilm order to the archives, based on this index, and thereby saving about 10% cost on many subjects.
- H) Date of Gemberling report corresponding to this CD number.
- I) Following the acronym "sny", and enclosed in the parenthesis: that portion of the synopsis which applies. (See note 12, "Notes and Com
- J) A list of published pages, if any, and the CE #s. Also, withheld pages, if any.
- K) total of abnp pages on this particular subject. Two numbers appear: the one preeded by the "*" indicates title pages, which will not be ordered, unless this designation turns out to be erroneous. The other number is the page count which is the realistic basis for computing the price. (*pp=6; abnp=40 means there are 40 pages to be ordered, and possibly 6 more, if the first pages of particular sequences turn out not to be title pages.)

(syn: Roy S. Truly, superintendent, TSBD, Dallas, Texas, expressed opinion Oswald did not plan assassination before ~~xxx~~ approximately 10:30 a.m., 11 21 63, which was approximate time the Dallas Times Herald newspaper appeared on streets displaying schedule of President's route prominently in middle of front page. Howard Leslie Brennan, who saw man in sixth floor window near southeast corner of TSBD at time of assassination, reinterviewed and states saw man in this window prior to first shot without rifle. After hearing first shot, looked at same window and saw man take deliberate aim and shoot rifle. He thereafter ran to notify police officer that shots came from TSBD. Previous investigation reflected Oswald claimed in interview after assassination to have eaten his lunch on 11 22 63 in lunchroom at TSBD, and recalled two Negro employees walked into the room during this period, and stated one of them was known as "Junior." "Junior" identified as James Earl Jarman, Jr. Jarman and others who were with him just prior to assassination, deny having seen Oswald in lunchroom at TSBD. Lillian Mooneyham, from window in Records Building, states heard shots and immediately thereafter observed figure of man standing in a sixth floor window of TSBD behind some cardboard boxes. She could not make out man's features and could not describe him. Other individuals who watched motorcade from Records Building interviewed.)
