Dear Sylvia,

Thanks for the telephone call - really enjoy talking to you.

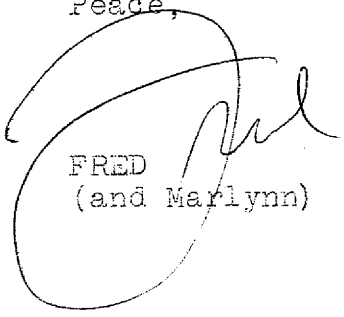

You said something during the call that interested me very much. You said that Adm. Burkeley was a "paper doctor" and I was wondering what you meant by that. Did you mean that he was performing largely ceremonial functions and was not a real M.D.?

I would be interested in knowing ~~xx~~ if this was just an expression you used or if you meant something else.

It's okay if you send that confidential letter to Mary.

Spoke last evening to 60 members of an experimental college and think there might be some hope if enough young kids get interested in this "case". There is enough interest at Santa Monica College at least for the ~~xx~~ class to meet every week since last October.

Peace,

FRED
(and Marlynn)
