Book Cites Warren Report Weaknesses

"INQUEST." By $E d w \alpha r d$ while the commission says two Jay Epstein. New York: Viking

By HERBERT KENNEY JR.

This is a disturbing book since it raises some bothersome questions about the procedures and the motives of those who produced the Warren Commission report on the assassination of President Kennedy.

Edward Jay Epstein set himself the task of reporting how a public body, the Warren Commission, operates when there are no precedents or guidelines to help it carry out its mission.

His conclusion it that the resulting "report" is hardly the exhaustive investigation to get at the truth it was represented to be, and more a document that was intended to allay any public fears that Lee Harvey Oswald was not a "loner" and was not involved in any sort of conspiracy.

ACTUAL SHOOTING VERSIONS DIFFER

discrepancies which the comover or didn't take the trouble and found baseless. to investigate. But the bedrock basis on which his major questhree shots in 5.6 seconds, on this subject.

hits in three shots in 5.6 seconds. The two versions, Epstein says, both cannot be

In his presentation of data about the internal workings of the commission, Epstein raises even more cause for concern. It was faced with a mountain of reports and documents and its members did not have the time to evaluate everything that was in the reports.

In addition, the commission was put under extreme pressure to complete and publish its report before the 1964 November election. As a result of those two circumstances, Epstein contends that the commission's members and staff did not, indeed, could not, do an adequate investigative job and did not weigh all the data carefully.

Epstein's book, and others that are sure to follow, may well open a Pandora's box of speculations about conspiracies(a "second assasin," a "double" for Oswald, or just Epstein shows evidences of the sort of speculations the Warren Report was supposed mission ignored or glossed to have checked thoroughly

Epstein doesn't hold a brief for these speculations, as some tion is raised is the apparent critics of the report have done, discrepancy between the com- but he does cast some doubt mission and the FBI versions on the Warren Report, on how of the actual shooting: The and why it came out as it did. FBI report says three hits in This is not the last to be heard
