## Hoover Says Facts ShowOswald Alone WasKennedyKiller

Text of Hoover's statement is printed on Page 25.

Special to The New York Times WASHINGTON, Nov. 25-J. Edgar Hoover said today that no evidence had been found to indicate that Lee Harvey Oswald had had an accomplice in p the assassination of President Y Kennedy.

"Not one shred of evidence has been developed to link any other person in a conspiracy with Oswald to assassinate President Kennedy," Mr. Hoover said.

## Explains Discrepancies

y Commenting for the first time on the controversy over the adequacy of the Warren Commission's report of the assassination, Mr. Hoover said the critics had ignored or misinterpreted the facts.

He also gave the first official explanation of the discrepancies 15 between the two F.B.I. reports g on the assassination and the c Warren Report, The F.B.I. re- a ie. ports said the bullet that struck o ٤đ Mr. Kennedy below the back of h w the neck had not passed through s sthe President's body. by the pathologists during the autopsy at Bethesda Naval Medical Center on Nov. 22, the day of the assassination. At that time the doctors believed that the bullet had not gone through the body, but information obtained the next morning disclosed that it had, Mr. Hoover said.

By the time the F.B.I. submitted its supplemental report on Jan. 13, 1964, it knew the commission had been given a copy of the official autopsy report that said the bulket had passed through the President's body, Mr. Hoover said.

Therefore, he explained, the F.B.I. did not mention this in the Jan. 13 report.

Critics of the Warren Report. have pointed out that the only reference to Mr. Kennedy's wounds in the Jan. 13 F.B.I. report stated:

"Medical examination of the President's body had revealed that the bullet which entered his back had penetrated to a distance of less than a finger length."

Mr. Hoover explained that this had been followed by a statement that Mr. Kennedy's shirt had an entrance bullet hole in the back and an exit hole in the front. He said this had been intended to point up the fact that the doctors' findings contained in the first report had probably been in error.

Mr. Hoover concluded that "While there is a difference in the information reported by the F.B.I. and the information contained in the autopsy report concerning the wounds, there is no conflict."

Mr. Hoover's statement was directed to The Washington Evening Star, which had asked him to comment on the rash of books and articles that have criticized the Warren Report. The statement was later release to other news media.

#### **Criticism for Critics**

In an accompanying letter to The Star, Mr. Hoover said that, while the critics had every right to state their views, they "should show more regard for the facts on record."

on record." "They have ignored certain facts, misinterpreted others, and expressed pure speculation as truth," he said.

Mr. Hoover branded as "totally false" allegations that the F.B.L. had altered the film of the assassination taken by an amateur photographer, Abraham Zapruder. "The F.B.I. never had the original Zapruder film in its possession — it was purchased by a national magazine." he said, referring to Life magazine.

"The F.B.I. obtained a copy of the original uncut film and reproduced this for the commission, which since has turned it over to national archives," he added.

The discrepancy between the Warren Report's description of Mr. Kennedy's body wound and the two F.B.I. reports has fanned the controversy over the adequacy of the Warren Commission's investigation. In his book "Inquest." Edward

In his book "Inquest." Edward Jay Epstein pointed out that the F.B.I. had repeated in its of Jan. 13 report that the bullet had not passed through the President's body without stating that this view might be in error and without mentioning the contrary view expressed in the official autopsy.

Mr. Epstein said a person night find it "inconceivable that the F.B.I. would make a repeated error of this magnitude and import in its final report to the President."

After analyzing the evidence. he concluded that "all the evidence" indicated that the F.B.I. version was true and that the Warren Commission's statement was an expression of "political truth."

Critics say that the commission's conclusion that the same bullet struck President Kennedy and Governor Connally was crucial to its explanation of the crime. The commission has denied that it is necessary.

The Zapruder film showed that the two men were struck almost simultaneously. Since Oswald's bolt-action rifle could not fire two rounds in less than 2.3 seconds, the commission concluded that the same round had hit both men, and that Governor Connally had had a delayed reaction to his wound.

Mr. Epstein and other critics have insisted that, if the first bullet had lodged in Mr. Kennedy's back and had later fallen out, as the doctors first assumed, than Mr. Kennedy and' Governor Connally must have been hit by two riflemen firing almost simultaneously.
