

Ruby Condition Still Serious

Cancer-stricken Jack Ruby remained in serious condition at Parkland Hospital Monday, according to an announcement by doctors.

Ruby's condition has not changed since he was admitted to the hospital from his Dallas County jail cell Dec. 9.

Doctors say he is alert and resting easily, though the cancer has spread widely through his body.

The 55-year-old former night club operator was to have received a new trial in February for the slaying of accused presidential assassin Lee Harvey Oswald.
