the King case. The report, dutifully reported by the media, noted that James Earl Ray "acted alone."

That is a damn lie.

Why does Jimmy Carter put up with this lie? Didn't he promise us a clean, honest administration? My guess, which is more than that, actually, is that these power brokers already have Jimmy in their back pocket, shaking in his tennis shoes.

If you think I'm kidding, look at the people on his cabinet—all Old Boy Cold Warriors direct from the Secret Team. The nation continues under the control of these select corporate officers, bankers, and lawyers for corporate officers and bankers.

These coverup leaders have cranked up their propaganda machines at CBS, NEW YORK TIMES, L.A. TIMES, et. al., in a massive publicity campaign to destroy the honest investigation into JFK's death.

Are these major media controlled? You bet your sweet freedom they are. Why? The answer is power and money, the same symptoms that brought us the national disease of Nixonia.

These powerful men also have their puppets and other unthinking pals out giving disinformation to the media net owned or controlled. Locally, for example, Rep. John Murtha, a man the power brokers can count on whether or not he knows it, explained why he voted against an honest investigation into the JFK and King murders.

"It is extremely difficult to find new evidence or prove old evidence 14 and 9 years after the respective deaths," Murtha noted.

That is a damn lie.

Do you want to know who was behind the murder of John Kennedy?

The last hope we ever had of earning the truth is being brutally abotaged by the powerful men responsible for that murder, other times and their cover up. Our hope is the Congressional Commission formed to earn the truth of the murders of President Kennedy and Dr. Martin Luther King.

The latest news is that powerful forces have arrested Henry Gonzalez and other members of the commission, making it impossible for them to do anything less than the chaotic work they were doing. His behavior is the best evidence of that.

That investigator is Richard A. Sprague, an Abraham Lincoln brilliantly tough and honest man. He is emotional, a Gonzalez cheap shot, but with damn good reason. Sprague and his friends, some of the most powerful friends in the country, can't afford an honest investigation and some truth.

On the heels of this, the FBI pushed a panic button and had the Justice Department issue a pair of whitewash which gave the Bureau clean hands in

The truth is that so much totally documented evidence exists which proves without any shadow of any doubt that (1) Lee Oswald did not shoot John Kennedy or anyone else; (2) several people did shoot John Kennedy; (3) James Earl Ray did not shoot Martin L. King; (4) officials within the CIA, FBI and other governmental agencies know the truth and are covering it up.

It bothers me that Rep. Murtha is willing to forgive and forget two unsolved murders.

Who pulled the triggers on John Kennedy? Every single one of the assassins had CIA dirty tricks employment and experience. Several also had Mafia connections. Who commanded these men? The middle level planners included Clay Shaw, David Ferrie, Guy Bannister and Jack Ruby. These men also shared CIA and Mafia background. Who owned these men?

That is the Big Question this congressional committee has to answer so we can learn the truth about who seized control of our nation on November 22, 1963.

Millions of Americans deserve to know the truth about who ordered the destruction of "the political opposition." America is not some banana republic or European dutchy where coup is a way of life. Our heritage of freedom and democracy means too much to us for that.

I want to know the answer to that Big Question. Don't you?
