MEAGHER, Sylvia. Subject Index to the Warren Report and Hearings & Exhibits. Scarecrow, 1966. 150p 66-13736. 4.00

Since the *Warren Report* on Kennedy's assassination is currently under heavy criticism this subject index will be a valuable research aid, especially to those libraries housing the entire report and hearings. Libraries without the complete investigation should have this index also in order to allow students to engage in spadework. Of interest here is Meagher's use of what she calls *negative references*, i.e. items or acts related to the subject, but not mentioned as such. Recommended.
