## Bookshelf

by  
Jim Drummond

**Step-By-Step Decoupage**  
by Dee Davis and Dee Frenkel (\$2.95 from Golden Press) is illustrated in full color and has clear step-by-step directions for mastering decoupage on wood, glass, metal and other materials. The book is part of the publisher's "Step-By-Step Craft Series" which also includes ceramics, weaving, knitting, macrame and such topics.

**Accessories After the Fact** by Sylvia Meagher (\$5.95 from Vintage) is perhaps the most complete and well-respected analysis of the Warren Commission report on the assassination of President Kennedy. The author has shown many inconsistencies and documents her conclusions. Many of the claims made in the book have, in recent years, been proven true. Most assassination scholars value this volume above all others.
