

In the minds of many... the true story of the assassination of President Kennedy has never been told. Sylvia Meagher agrees. Her "Accessories after the fact" makes a strong case for discounting the official version, according to her, the Warren Commission ignored all evidence that didn't fit its theory that Lee Harvey Oswald acted alone. In her words, "by no standard can its investigation be considered conclusive, complete or objective." Meagher makes a strong case for re-opening the investigation into the president's death at a time when political assassination throughout the world is shaping history.
