Bias and predisposition

Considered only Depository in accounting for source mark on curb, Tague cut
Favorable toward Brennan, self-admitted liar; unfavorable toward Worrell, who
reported man fleeing from rear of TSED

Impeached Rowland, but ignored manifest police perjury and concealed Griffin
accusations against Dean, Newman of perjury

Interpretation of Zapruder film as consistent with lone assassin

LHO had enough time despite traffic, Ruby did not because of traffic

Thesis of "delayed reaction" to wounds in vital organs causing involuntary reaction

Conclusion that shield of cartons needed for concealment when pillars, cartons already on sixth floor provided built-in shield

Acceptance of Bledsoe testimony LHO had no jacket, vs three other witnesses who said he was wearing a jacket

Circular reasoning on purchase and possession of ammunition, established only by inference, on basis he used it; and thesis markings on shells came from dry runs (i.e., his only 4 bullets ever?)

Advocacy of single-missile theory regardless of actual size Connally back wound-- whether 1.2 or 3/5 inches.

Contrived explanations of lack of match between Tippit bullets and shells found

Evaluation of LHO/State Department transactions as "normal"

Overriding importance attached to lost Bogard card

Attacks on identifications of Ruby, as against complacent acceptance IDs of LHO
