

WILLIAM SUCHER, Director, International Firearms Company, 1011 Bleury Street, Montreal, Canada, stated that his concern sold 6.5 Mannlicher-Cargano ammunition, manufactured by Western Cartridge Corporation, to dealers in the United States until 1961. It has not sold any of this ammunition to anyone in the United States since that time. The company has never sold this type ammunition to any individuals in the United States.

He stated his company has no record of LEE HARVEY OSWALD under his name or aliases.

Mr. SUCHER stated that before any guns or ammunition can be shipped to the United States from Canada, the purchaser must file a United States Customs declaration in the city of his residence and a copy of this must be sent to the Canadian dealer. The shipment would then be sent to the United States Customs at that city under bond. He said this is so complicated a procedure that no individual would utilize it on a small order.

Mr. SUCHER stated that having formerly operated in the firearms business in the United States he is aware that this type ammunition is available through dealers in many cities in the United States and it would be unreasonable for anyone to attempt to buy it in Canada for shipment to the United States.
