

Telephone Call to Mr Herbert Orth
Assistant Chief, LIFE Photo Lab

Thursday 4 November 1965 at 7.30 pm

Lyndal Shaneyfelt told me on the telephone on 22 July 1965, in reply to my question about the four missing frames (208-211) in the Zapruder color slides, that these frames were not included in the set of slides provided by LIFE and that he assumed that they had been omitted because the film was broken or damaged.

According to Shaneyfelt's testimony (5H 139) Herbert Orth of LIFE had made up the color slides for the Warren Commission.

I telephoned Mr Orth and asked if there had been any interruption in the sequence of the frames (171-434) for which he had made color slides given to the Warren Commission.

Mr Orth replied, "No, there was not."
