

9/23/66

Dear Sylvia,

Thank you for your prompt reply to my inquiry.

Your memory is good. To refresh it you have only to read Shaneyfelt's testimony (✓). By connecting it I get:

1- Original life film seen by FBI agents, Sec. Serv. agents, and "Commission representatives" all together - date not stated.

Reason: copies given by Z to Sec. Serv. who lent one to FBI to make a copy not distinct in "important particulars" and detail missing.

2. Slides made by Life from original for gov't. much

clears. Slides numbered by Shaverfelt.

3. Slides and films shown at "analysis sessions"

on 4/14/64 to reps. of Comm., FBI, and Dr. Humes,

Commander Roswell, Colonel Finck, Dr. Olivier, Dr. Light,

and on 4/21/64 reps of the Comm. & the FBI, Drs Gregory

and Shaw, Drs Light and Olivier, "a Dr. Dolce," and the

Connallys.

During Shaneyfelt's testimony (6/4/64), Specter told
Dulles & McCloy "we want to have the Commission
see these slides this afternoon ... so that you can
observe for yourself what we are bringing to you
through the witness to give you a frame of reference
and an orientation."

No reference to the Commissioners per se, in session,
seeing the film. In view of the above and in the

absence of evidence the film was shown to the
Commission we may conclude they saw only the
slides:

Impossible that the evidence of the film that

showed K hit from front & side was not remarked
by counsel and FBI, ^{Conroy} showing only slides which do not

show K hurled backward deliberate. This does

not include probability Conroy's informed of difference
of the record. ✕

Nober point. Thomas saw film. ∴ H knew

shot was front. His autopsy deliberate lie
