LR Resol (L. 360/Res. 1)

Panama introduces resol.

Dahomy resol^{para 4} asks govt "support" measures they themselves will introduce. asks aimed to pay

"less to govt the impact of
financing effect to ..."

para. 5 (eco/soc infrastructure, etc.) - also disturbs him.
Is very imp pt, needs + consid. Why
shd this be govt investments? Eco/soc shd
not venture such explicit rec re investment
of public \$. Shd not intervene in domestic
policy tho could remind some things LR
essential, or trouble will follow.

And para. 5 "emphasizes need for govt
conceded create eco/soc etc
and make necessary investments therein..."
"... to promote CD."

have points well taken, am except his
amendments in principle (and in
the letter) - (?) Only a misunderstanding.
