Date 11/29/63

Mr. GERALD A. BEHN, Special Agent in Charge, White House Detail, United States Secret Service, was interviewed at his office and advised that during the President's visit to the State of Texas, then Vice President JOHNSON would always arrive at the next city to be visited ahead of the President and would join the party awaiting the President's arrival. This was accomplished by the use of two Jets; Air Force I, which carried the President; and Air Force II, carrying the Vice President. On departing from a city, Air Force I would first take off followed by Air Force II which would thereafter pass Air Force I in flight, cruising at a faster speed, thus allowing the Vice President to arrive prior to the President and be with the greeting party.

Mr. BEHN was questioned concerning the section of the President's skull, which was brought to the National Navy Medical Center at Bethesda, Maryland after the autopsy was in progress. He advised that this section, which was measured by the Doctor performing the autopsy as being 10 x 6.5 centimeters, was found in the Presidential car on the floor between the front and rear seats. He further related that two fragments of bullets had also been found in this vehicle in the front of the car and that the windshield had been cracked by the impact of one of these fragments.

BEHN was likewise questioned concerning the location of a bullet which had been found on a stretcher at Parkland Hospital in Dallas and which had been turned over by the Secret Service to an Agent of the Federal Bureau of Investigation for delivery to the FBI Laboratory. He stated that on learning of such a bullet being found at the Dallas Hospital he inquired of a group of his Agents who had returned from the Dallas trip on the night of November 22, 1963, and Secret Service Agent RICHARD JOHNSON produced this bullet which had been handed to him by someone at the hospital who had stated that it was not known whether or not the President had been placed on the stretcher where the bullet was found.
