

11 November 70

Sylvia Meagher
NY

Dear Sylvia:

Thanks for your letter of 7 Nov with advice what to do.

Lest I forget, let me now give you my phone numbers:
(area 613) 542-5015 --- this is my home phone.
(area 613) 547-3163 --- this is the phone of the
Classics Dept. at Queen's.

I have started writing the material in a form that will be suitable for publication. I do not have very much time and usually write tediously, so this may take a while. No matter, since I would like to wait until I have a set of suitable photographs before I regard anything complete.

I'll get in touch with Braverman as soon as I am able. Will send you a copy of the letter.

I have no objection to the matter being disclosed to Newsweek or the N.Y. Times if you think that is best. I suggest, however, that in addition to having the information about the dustlike fragments, you also have some sort of authoritative opinion about it-- i.e., Wecht's, Braverman's, and that of other recognized experts. Even though the matter is unassailable, I think it very wise to buttress it against unfair assault. The best way would be to get experts on our side before the matter goes public. I think there will be no lack of approval from experts, but there may be some lack of courage-- much, perhaps. In any case, we must assume that ~~the~~ "they" will do as they have done in the past: wheel out some suitable nag from their own stable of experts. We know that such nags are willing to say anything at their masters' bidding; they have in the past, they will in the future-- and they surely will in this case.

In writing, since I'll anticipate being sole author and having a piece appear by itself, I'll bear more heavily on JFK's movements than I had planned. With that information too, there is nothing in the world that can touch it, no matter what sculduggerey is applied.

Mill,

Dick

P.S. Enclosed is copy of letter
to Braverman
