Walker Shot Linked to Oswald

DALLAS, Feb. 18 (AP)—The mail-order rifle believed to have killed President Kennedy was the same one used in an attack on former Maj. Gen. Edwin A. Walker, a police ballistics report indicated today.

The report was made public for the first time by Chief Jesse Curry and Chief of Detectives M. W. Stevenson. Mr. Stevenson said points of comparison noted on the slug that was aimed at Mr. Walker match fragments of bullets that took the President here.

The ballistics report cannot be final or conclusive," Mr. Stevenson said, "but generally the comparison points of the slugs were good."
