Dear Sylvia:

I enjoyed your phone call- hope the attached is of some interest to you.

Some years ago a woman was shot in NYC by means of a sawed-off shotgun concealed in a shoebox; had the assailant died before trial he would have been considered "fiendishly clever, etc." But he was not killed- and it turned out that he was duped into thinking that the contraption was a secret camera- and that he was merely taking a photograph.

I sometimes wonder if is possible that Oswald had been "set-up" as a patsey.

C o r d i a l l y ,

Shelley Braverman
