

Date 12/6/63

On November 28, 1963, the distance from the front porch of the Texas School Book Depository Building at 411 Elm Street to the bus stop at Murphy and Elm Street was measured and timed by SA IVAN D. LEE. By going directly east on Elm Street from this building it is a distance of five blocks and the time required to walk this was five minutes.

It is noted in order to consider the possibility that LEE HARVEY OSWALD attempted to cover the distance from the Texas School Book Depository Building to the bus stop at Murphy and Elm Street, a route was measured and timed from the front porch of the Texas School Book Depository Building to the bus stop on Elm Street at Murphy and Elm. This route was measured to be a distance of seven blocks and required seven minutes.
