(off blue) (FASTEST TIME)
11. Charles Hamby, H.P. White employee
--no time, jammed
--no time, jammed
6.5 seconds - 2 near misses, 1 nowhere

SUMMARY:

These riflemen used various techniques; some took the rifle off their shoulder more than others. No one liked the scope.

Out of 37 attempts to fire 3 shots at the moving target, only 20 record times were taken. In the other 17 cases, either a bullet jammed in the bolt-cycling process, for no time whatsoever, or the balky bolt slowed him up so much that the target completed its run before the rifleman would get off his third shot.

The average time, out of 20 recorded attempts, was 5.6 seconds.

Fastest was 4.1; slowest, 6.8. Times are approximate; we can get them down to hundredths of a second if desired when applying superimposed timer.
