# McCloy Regrets One Aspect of Warren Inquiry

# Wishes Panel Had Studied Photographs and X-Rays

### By MARTIN GANSBERG

John J. McCloy, who was a member of the Warren Commission, feels that the commission should have studied the photographs and X-rays taken of President Kennedy after his assassination.

He says the panel did not do so because "we were perhaps a little oversensitive to what we understood were the sensitivities of the Kennedy family."

Mr. McCloy, lawyer and diplomat, nevertheless insists that the seven-man commission "had the best evidence — the pathology in respect to the President's wounds."

#### 'Less Than Glorious'

In its concluding study, C.B.S. said that the work of Federal agents was "less than glorious" in the investigation after the assassination. "To some extent," the network said, "the performances of these agencies weakened the credibility of the Warren Report."

The commission, C.B.S. said, "seriously compromised itself" by allowing the Secret Service, actions.
