CBS ①

Owned rifle

No evidence delivered to LHO or in garage  
or in his possession at any time

Men in Window

Ernie, not asked describe  
Brenner, did not look up per 2 film  
LHO seen on 1st fl by Piper, Shelley,  
and a woman employee at 12:15 pm

Nonnara, did not testify re LHO gun  
CBS omits Bonnie Ray Wines who looked  
on 6 fl.

Says Gill (mistaken Luke Hoover) found shells

Wetzyan → never shown C2766 rifle to ID  
CBS omits ID as museum by  
Boone Wade & Fritz

Fails see sign Wetzyan stated had to  
move box & carton to get to rifle  
ie he did LHO, adding to his 1.14 time

Mrs Randle, never mentioned tope before  
why CBS not make packages name  
lengths - specifically test Fryer  
Randle & others, errors in estimating

Also, failed when Ferguson saw ~~left~~ place  
on back seat his car, 24", not merely  
50 feet away

## CBS In-house Tests

2.3 seconds  
does not include  
aiming time

Yes, letter replication of conditions but  
different rifle (presumably no bolt or trigger  
defect or scope defect corresp = C2766)  
CBS did not specify skill its 11 riflemen  
— presumably not "191" per LHO, 2 are  
State Troopers is professionally adept  
Also CBS allowed indoor target practice  
before the tests — LHO no firing practice  
at any time, & rifle not accessible  
for 2 mos before 11/32

45% risk of rifle malfunction

Where LHO get ammo?

What ammo used by CBS?

What about ammo clips?

Did 11 test riflemen leave prints or not?

# Camera Speed

Theoretical variations in speed very  
interesting cut does CBS check? FBI  
determine of 18.3 (US norm 16) ?  
Conceded 24 ft per sec is possible on  
the camera :- Has it been eliminated ?  
If so, how ? (X)

Bleeding  $\rightarrow$  occurs at frames other  
than 2 add to those specified (check this)  
Film in tests jingles, 2 film does not  
2 could have been started or  
halted by things other than slats i.e.  
when JFK comes clearly into his view etc.

If just slat missed & next 2 hit  
for total of 3, how CBS account for  
Tague cut a mark on curb ?  
One bullet mark in WW II ?

(X) Huzfelt 51176 using 2 camera  
filmed at 26 ft per sec in
