him a letter.*

EXECUTIVE OFFICES

13 April 1967

Dear Mrs. Meagher:

Am accumulating a few queries, but shall field them one at a time, so that I get them done.

(Will send you some new stories, to see if they tie in with any researchers' theories.)

Here are 12 questions posed by Joesten -- and I am wondering if any of them are valid. If you can find any we ought to pursue, and can cite the pertinent exhibits, testimony and report of the Warren Commission I would be most grateful.

I will have to have his material back, as it is my file copy and it wouldn't take on our photostat machine.

Also I'm very leery of Joesten since reading the report made by his own wife that she thought his behavior odd and that he was then on the verge of a breakdown, and had gone off to Europe without letting her know -- do you know of any place I can get further biographical material on him? When he was interviewed in Germany for the Report he said he had written an article which STERN had refused to publish. Do you know what article that was?

Incidentally, I read the material written by Prof. Oliver (Revilo) and frankly I wonder about a fellow whose first name is his last name spelt backwards. Has he had anything whatsoever to offer that anyone else believes?

Is there anything besides Marina's own self-serving testimony to associate Oswald with the attempt on Walker's life? Has that been documented, or was it just given circulation by Marina? (I read her frankly unbelievable statements concerning his plan to do away with Nixon, and I got the feeling that even Rankin disbelieved her. Is there any substance to that charge at all?)

At your leisure,

MRS. T. G. P. CANN
