

Mrs C telephoned just before the gathering of the clan; Maggie Field listened on the extension.

Mrs C reported on a series of contacts with NEWSWEEK, to which she had sent the material on LHO "patsy" as well as copies of her letters to the WC. She had called attention to the business of the traffic signs (cropping of Willis slide) and Gov C's wounds & shots. She asked NEWSWEEK if there was a gentleman's agreement not to publish material raising doubt about the WR findings. (This was denied???) NEWSWEEK expressed interest, sent Mrs C's material to their Washington bureau. Heard nothing further. Contacted the reporter (Miss---?) at her home finally, asking why no word. Miss X said "There is no answer." NEWSWEEK had found as many discrepancies (as Mrs C) but with a Commission of such eminence there was no way to argue with them.

(Someone?) (Dallas surveyor?) had obtained 12 photos from Zapruder's position, 8 from Nix's, 4 from Muchmore's. Pictures very sharp and clear, can see what is behind Connally when he was shot--ie--jail and records bldg with bricks connecting the two bldgs on Houston Street--one window in middle section above a tree, from which trajectory in frame 244 would be consistent with Gov C's wounds. (Vince Salandria later dismissed this theory, no sign any person or any shots from there, and vastly greater distance, perhaps 500 yards.)

Mrs C reminded me again, agents in May 1964 reenactment said to be seated on pillows, per NEWSWEEK of June 8, 1964--she thinks to conceal fact Gov C back not exposed to 6th floor TSB window because high jump seat back intrudes.

Maggie F and Mrs C had brief conversation, Maggie promised contact her on return Beverly Hills in Nov.
