

11 December 1965

Dear Lillian,

Since our telephone conversation the other night, I have checked Jean Hill's testimony again and on page 221 of volume VI she quotes a Secret Service agent as saying "we~~x~~ were standing at the window and we heard more shots also" but I don't find any indication of the building in which that window was located. Can you please let me know where you have the reference to a specific building? (If it turns out that not all volumes VI have the same text, it would be very interesting, though hardly surprising.)

One more thing---I have also checked on some letters I received from Dave Lifton, after hearing about the ambiguity that seems to have arisen about your discovery of the coincidence between Willis 5 and Zapruder 202. I found that in one letter he went into the meaning of your calculations, writing in such a way as to make it clear that it was your work, on which he was merely commenting, but definitely yours.

Hastily,

Sylvia Meagher
