# New Kennedy Death Panel Urged

## New York

A proposal that X-rays and photographs of President Kennedy's body be examined by a committee of scholars and doctors was made public yesterday as a way to back up the Warren Commission's report that Lee Harvey Oswald alone killed the President.

The proposal contained in the current issue of the Nation, was made by Jacob Cohen, who was described as completing a book to defend the conclusion made by the Warren Commission.

Cohen, 32 years old, a freelance writer, of Montclair, N.J., is teaching disadvantaged children in Boston this summer, and was formerly on the history faculties of Yale and Brandeis universities.

### PHOTOGRAPHS

Cohen wrote that 25 to 32 X-rays and at least 15 to 20 photographs had been taken of Mr. Kennedy's body after the assassination. He argued these could show whether a wound in the President's back had been high enough to

sustain the theory of a single bullet wounding both the President and Governor John B. Connally Jr. of Texas.

They could also, he contended, refute suggestions that the President might have been shot from the front or side—a theory requiring a second assassin.

### REQUESTS

It was unclear, he wrote, whether the Warren Commission "ever requested and received the X-rays." He reported that several commission lawyers had told him the

photographs and possibly the X-rays had been withheld from publication at the request of Senator Robert F. Kennedy, the President's brother.

This might have been "for reasons of taste," Cohen wrote. Another "innocent explanation," he said, was "to avert low-minded speculation that Mr. Kennedy was a dying man when he was shot" because of possible indications of the President's known adrenal insufficiency.
