$\qquad$ August 34.1964

1
H. S. ATKEN, Ladman, Toxas School, Book Dapository. 412 RIm Streot, Dallas, Texas, was intorviowad at his place of employnont.

ATrein, who is cormonly roforrod to by his ntcknama "Sysvis", advisod that ho koops tha daily amploymont recorde of the varchouso employoes. Ho stated tho omployoes do not uns a tima clock to record thoir timo of arrival, doparture or time takon for lunch. Ho stated that he is advisod in the mornting as to who is at work and at tho ond of the vorkday who is still at work. The normal workday consists of aight working hours.

AIPEA stated that no notation of any sort is rade of the tima an omployac takos his forty-five minuto lunch poriod, that is, tho omployoo's tima of doparture for lunch and tho tima of his roturn.

AIRSN notod his timo rocord for IES EARVSY OSTALD indicatos that during tho wook of Novamor 4 through November 8, 1963, OSmLD was creditod with having workod aight hours oach day from Honday, Novamor 4, 1963, chrough Friday, Novembar 8, 1963. ..

AIKEN statod that if an omployoo was gono for a paricd of tima much longor than tho omployoe's forty-five minute lunch poriod, ho would havo roportod this information, and the time would havo boan doductod from tha omployoo's pay for tho day. In OSvid's particular case, there had boon no notation that osward was gono for lunch on oithor Novambar 6 or Novembar 7, 1963, for any oxtondod paricd of tima in orcoss of his nomal forty-five minuto lunch pariod, and AIEBs would surmise that OSTALD had not ovorstayod his lunch pariod on thoso days.
