

19 July 1966

Mr. Paul Hoch
2701 Ridge Road, Apt 304
Berkeley, Calif. 94709

Dear Paul Hoch,

You were most thoughtful and kind to write me and to send those extremely valuable enclosures. Please accept my sincere thanks. I am already indebted to you for discovering and making available the Sibert/O'Neill report and the Secret Service report no 767 on Hudkins; and I am also grateful to Vince for putting us in touch with each other.

It is incredibly generous of you to offer to send me copies of material you have obtained from the Archives and I cannot tell you how helpful that would be. With Vince's help, I have obtained some microfilm copies of documents from the Archives, which I have been studying as and when time permits on a viewer in the UN Library. One of the documents is CD 3, about which you mention a significant statement by Clint Hill which is not included in the ^{published} documents. Upon comparison, I find that in fact Hill's report in CE 1024 is actually more complete than the corresponding report on my microfilm copy--that is, page five of Hill's report (Volume XVIII page 744) is missing from my microfilm copy. Otherwise, the microfilm and the published document seem to be identical, so far as Hill's report is concerned.

I am very interested in CD 87 Volumes 2, 4, and 5, but as I interpret your descriptive list, you yourself do not have those exhibits. I am interested also in CD 107, the interview with Mrs. Demohrenschildt, since her final story and Marina Oswald's seem to me to be in basic conflict anyhow.

CD 1553 has special importance and I am very anxious to see the four pages you have. Can you please send me a copy? (The Odio investigation)

Your directory to the Archives as well as your notes on the CDs are truly valuable and I congratulate you on your well-organized, cogent descriptions.

Again, my thanks. I would like to hear more from you, when you have time, about your own views on the WR and the events of 11/22-24/63. Have you done any writing?

Yours very sincerely,

Sylvia Meagher
