1. Continuing Dan Rathers description of the movie film he saw. Describes the scene leading up to the assassination. The President's open black automobile was making a left turn off Houston Street onto Elm Street, right on fringe of downtown area. The turn was made from just below the window where the shot was fired.
2. As the car made the turn and went past the building (keep in mind the window was on the 6th floor) it got about 35 yards from the base of the building. President Kennedy had just put his right hand up to the side of his right eye, brushing back his hair or rubbing his eyebrow. Mrs. Kennedy was not looking at him. Sitting in front of the Kennedy's were Governor and Mrs. Connally, sitting in the jump seats. The Governor and President were on the same side of car, and the side of the building where assassin was located. Mrs. Kennedy and Mrs. Connally were on the opposite side. Two Secret Service men were in the front seat. At almost the instant the President put his hand to his eyebrow and Mrs. Kennedy was looking away, the President lurched forward. It was obvious that he had been hit but you had to be looking closely. Mrs. Kennedy was not aware that he had been hit, however Governor Connally seemingly heard the shot and sensed something was wrong because he turned in such a way as to extend his right hand and his expression seemed to say "What happened, what's the matter!" When the Governor turned, his whole shirt front was exposed--at that moment a shot very clearly wounded the Governor, who fell back in his seat. Mrs. Connally threw herself over the Governor. This was the second shot. The third shot definitely hit the President and he fell forward with considerable violence. Mrs. Kennedy stood up immediately, her mouth wide open. The President slumped over against Mrs. Kennedy and nearly toppled her over. Mrs. Kennedy threw herself out of the back of the car onto the trunk of the car, on all fours, stretched out--a Secret Service man was on the bumper. She either tried to help him get into the car or she felt there was danger--He pushed her back into the car as she seemed to be in danger of falling off the trunk. A Secret Service man in front seat, was already on the telephone and the car sped away. It took about 20 seconds to complete these events. Three shots fired total, and the President was hit by two.
3. This film was taken by an amateur photographer, 8 mm color camera, who had positioned himself on a street light base, focused on the automobile.
