Hickel Lauds President For Remarks on Youth

WASHINGTON, May 8 (AP)—Secretary of the Interior Walter J. Hickel tonight praised President Nixon's news conference remarks about the nation's youth.

"The young people of America should be reassured by the President's determination to work together with all those millions of Americans who share his loyalty to the nation, if not always the same views," the Secretary said in a statement.

Mr. Hickel, in a personal letter to the President, had said yesterday that the Administration was in danger of alienating the college-age generation.
