Film Attacks Death Report On Kennedy

New York (AP)—Mark Lane, attorney for Lee Harvey Oswald, said by the Warren Commission to have assassinated President Kennedy, Monday showed filmed interviews with three assassination witnesses who dispute certain commission findings.

Each witness said he thought the shots that killed Kennedy came from in front of the presidential motorcade instead of from behind it, as the Warren report says. One witness said he saw a flash of light or puff of smoke come from a point ahead of the motorcade.

All witnesses in the film clips testified before the Warren Commission during its official probe.

The clips were shown in connection with publication of Lane's book "Rush to Judgment."
