Dear Mr. Welsh:

You are correct about the SS report on Hudkins. Apparently Hudkins mistated the facts when he talked to me.

At the time my story was written, Epstein had not seen the report you sent, but only a reference to it in the notes of one of the Warren staff members.

While I erred on this point, this does not change the fundamental thesis of the article---that Epstein wrote a very ~~xxxxxxx~~ deceptive book. If you wish to look into this matter yourself, I'd suggest you read carefully what Epstein has to say about a witness named Rowland, and then read what the Warren Commission said, together with a batch of reports ~~xxx~~ in the exhibits section bearing on Rowland's credibility.

The Warren Commission had plenty of shortcomings, but the unbiased, objective book on the findings is yet to be written.

With best wishes,

Sincerely,

Fletcher Knebel
