Dear Ray:

Thank you for your newest work. It convinces me that President Kennedy was struck by a bullet in the front of the neck prior to fr. 193. In conjunction with Lillian's work, it represents an important contribution to the case.

David, in response to a letter I wrote, stated that he would not interfere with the publication of the photographic material. He is a young man who deserves our continued support.

The New Leader of Nov. 22 and Dec. 20 has two articles which will be followed by another written by Leo Souvage. The articles are very well done and repudiate the Warren Commission findings.

Although I have not contacted Stamm, I will do so. Liberation has not replied to my letters and calls about Lillian's material. I don't know quite what to make of it, except that the material is being reviewed by a literary critic who is going to make up Liberation's mind for them.

Tell Lillian to be a little more patient. I will keep pressing for a response.

Regards,

Vince Salandria
