L. A. 90035

Dear Sylvia,

I saw Lillian after speaking to you and she pointed out that I should have included another hypotheses; which I shall add as MISS-3b ong page 65. This involves the possibility of 399 resulting from a "weak charge", landing in the grass, and being retrieved and then planted on the stretcher, (possibly recovered from the grass by ~~as~~ ^{the police officer} pictured in the Nerin Gun photo per Lillian -- or the police inspector referred to by Dudman in "Commentary of an Eyewitness").

Unfortunately, dealing with the ramifications of this will add at least a couple of pages -- which obviously is the wrong direction if this thing ever had a prayer of magazine publication.

However, since I feel the hypotheses are the heart of it if one is going to employ a process of elimination, I would appreciate any additional plausibilities you can think of that would imply different results from any of those covered.

Please keep ~~it~~ this copy until we've been able to exchange correspondence on it. Many thanks,

Cordially,

Ray
