

Hydra:

2/10/67

I could not agree with you more! Enclosed is my latest letter from Striso, who originally contacted me back in October, I believe. He told me Weisberg was his "pal," so I wrote Harold asking about this. Harold had had letters from him, I think, but had not met him. Striso told me he had talked to you on the phone. I was leery of him from the start as he harped so much on narcotics & on physical danger. His letters always seemed to be hay-warnings. As you see he writes that communicating with me has been "a one way street" but I intended it that way — particularly after he filled me letter with

strange requests for information
on Mark Lane. He also has
no genuine interest in the case -
dismisses Ruby as being "dead
& I am concerned with living
people." I am afraid he may
be a plant from the bad side
of the coin, & I don't mean the
Government!

I surely appreciate your letter.
This man has bugged me - I yet
I hated to condemn him without
other people's points of view. I
had planned to send one of his
letters to you (particularly this
last one) & now I am more anxious
than ever for you to read it.
Keep it. I don't want it back.
much love - & be careful - *Shirley*
