Whilst congratulations are due to Scarecrow Press for having the courage to publish this index it is a criticism of the U.S. Government that a publishing company in the private sector has to take over the responsibility of offering this information to the general public. Surely such an index should be a natural appendix to the Government Volumes of the Senate Investigation?

This is the second occasion that Mrs Meagher has had to take of this valuable task, and it is ironic that this volume, apart from containing the wholly new section pertaining to the HSCA project, also reprints the 1966 Index to the 26 Warren Commission Hearings. The original has been out of print for many years and this complete index is therefore an obvious item for every researcher, scholar or "buff" to have on his shelves for easy reference. It doesn't answer all the questions but it IS the greatest assistance that we are all ever going to be offered between two covers!

A BIG "thank you" to the authors for their efforts in compiling such a treasure!
