The following review appears in THE REFERENCE BOOK REVIEW, volume 3,  
number 2:

## POLITICAL SCIENCE

Meagher, Silvia in collaboration with Gary Owens.  
MASTER INDEX TO THE J.F.K. ASSASSINATION  
INVESTIGATIONS. Metuchen: Scarecrow, 1980,  
xi-435 p., ISBN 0-8108-1331-9, \$20.00.

For hard-core J.F.K. assassination followers only. This book is generally divided into two parts. The indices to the investigation by the House Select Committee on Assassinations constitutes one section while the other consists of the indices to the Warren Commission Report. References to both sections appear together in a subject index which may be the most useful section of the book. The explanatory listing refers the reader to the subject index which refers the reader to either the House Committee index or the Warren Commission index. Thus, in order for this Master Index to be helpful, one must have a copy of the reports of each of these two agencies on the Kennedy assassination. No other references are cited. The report material was obviously well-researched for it is detailed and concise, though its usefulness is just as obviously limited to a very few people.
