about la France

SM:-

excuse informality but I only have a sketchbook with me - thank you for your going-away party - I don't usually start the evening imbibing at 15~~00~~ but I couldn't refuse your kind offer and obviously I was more than excited about being able to talk and contribute <sup>info</sup> to someone of your stature -

pls note: Accessories p 208.

LHO L5 = 12.75" put them together = 61%  
rifle = 7.75"

now, please try this on your piano -

LHO L5 = 12.75" put them together = 54.8%  
rifle = 7.00"

in other words: as you state p 48 fn - does the erroneous 36" rifle fill the bill? -

perhaps sharper measuring will do better - i.e. 57%

does this help? it would remove LHO from

the rifle in the TSBID n'est-ce pas?

or would it only further complicate?
