Dear Mrs. Meagher

I am enclosing the photocopies previously mentioned. I hope you do not become discouraged although I feel it will become increasingly more difficult to obtain concrete evidence. Important witnesses undoubtedly have been secured by the many members of interests so concerned by your case and more actively in further investigation.

The Court proceedings & testimony and previous mentions regarding me & that when the name was called, immediately, in the 1951, as it is said, papers were included in an envelope addressed to Mrs. Jacobs at the FBI as a matter in the 1951, as well.

But I hope someone possesses with references in the past to show that you were not involved this year some coverage of justice was made available before the records are opened and ready.

Sincerely,  
Nathan Jacobs
